

Cold & Allergy & Symptom Relief

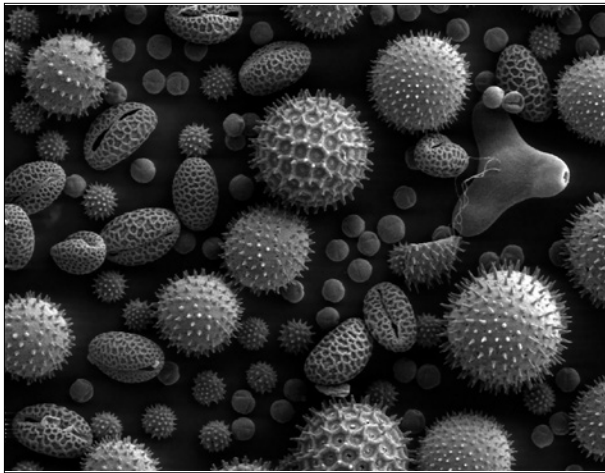

O₄ Oxygen NasalsprayTM

SALINE - OXYGEN - ZINC

When colds or allergic reactions set in, the sinus membranes swell and irritation, itching and increased stuffiness (mucus build-up) occur.

Now, for the first time, relief is possible in a natural, drug-free, unique and proprietary blend of saline, polyatomic tetraoxygen molecules and plant-derived lyophilic colloidal zinc.

Pollen and Dust: major nose irritants.

When colds, the flu or allergies occur, the sinus membranes become inflamed and restrict breathing. O₄ Oxygen Nasalspray™ helps reduce swelling, opens up the sinus cavity and promotes healing.

O₄ Oxygen Nasalspray™ provides fast relief to dry, stuffy noses and thins the mucus.

Unlike metallic colloidal or ionic zinc solutions, our plant-sourced zinc colloids (each smaller than 70 microns) possess a powerful and beneficial effect on upper respiratory infections (rhinovirus common colds).

Rhinoviruses are now known to be the cause of the great majority of colds.

Dr. Bruce Korant, PhD, of Du Pont Chemicals, published an article in Nature in 1974, in which he described the current research demonstrating that Zn₂⁺ ions were strongly antirhinoviral. Other researchers have shown that Zn₂⁺ ions help T-cell lymphocytes release large amounts of interferon-gamma, a powerful antiviral agent.

The same Zn₂⁺ molecules in O₄ Oxygen Nasalspray™ help in treating common colds and promote anti-inflammatory activities, the destruction of histamine, stabilize cell plasma membranes, (Zn₂⁺ may prevent cell leakage, congestion and runny nose), and stimulate T-cell lymphocytes into action.

With allergies and colds, there is nasal obstruction and inflammation. When the normal clearance of mucus from the nasal passage toward the throat becomes obstructed, there is a retention of mucus within the sinus cavities. O₄ Oxygen Nasalspray™ may help liquefy these secretions and decrease the risk of crusting in the sinus cavities.

Scientists now also agree that oxygen plays a powerful and primary role in our overall health and well-being. A growing number of researchers have confirmed that the best way to improve health may be related to the optimum oxygenation of every cell.

O₄ Oxygen Nasalspray™ oxygenated saline nasal spray with zinc has no side effects nor negative interactions with other drugs, so it can be used alone in or conjunction with other medications to aid in relief and healing.

When used regularly, O₄ Oxygen Nasalspray™ improves breathing, helps the mucous membranes filter out harmful irritants, improves the sense of smell and reduces bad breath.

Regular use of O₄ Oxygen Nasalspray™ may also reduce the need for antihistamines. When used on infants and young children.

O₄ Oxygen Nasalspray™ contains O₄ Stabilized Oxygen™, a unique formulation of activated oxygen in a saline base. Unlike its predecessors, which use either hydrogen peroxide or chlorine bound oxygen molecules, O₄ Stabilized Oxygen™ is a natural product containing bioavailable oxygen in a pH balanced solution. The oxygen in O₄ Stabilized Oxygen™ has strong antimicrobial properties.

O₄ Stabilized Oxygen™ has been the subject of more than two dozen independent research studies at laboratories and at universities all over the world. Athletes, scientists, educators, health professionals and practitioners have testified to its safety and efficacy over and over again.

Research supports the use of saline solutions to restore moisture to dry nasal passages and sinuses and to lessen the inflammation of mucous membranes. Findings show that if saline irrigation is used regularly, just like the saline solution in O₄ Oxygen Nasalspray™, it can help to thin mucus, decrease postnasal drip, and cleanse the nasal passages of bacteria

O₄ Oxygen Nasalspray™ is the only saline nasal spray in the world with the power of oxygen and ionic zinc.

Why O₄ Oxygen Nasalspray™ is unique:

- Gentle enough for infants.
- Alcohol free, drug free.
- Contains bioavailable oxygen.
- Child-size nasal applicator.
- Safe for frequent daily use.
- Natural, non-medicated relief for stuffy noses, with no side effects.
- Instantly soothes dry nasal passages.
- Enhanced with plant zinc.
- PRESERVATIVE FREE.

Distilled Water, O₄ Stabilized Oxygen™, Sodium Chloride, Phyto•Ionic Colloidal Plant Zinc.

Like any other substance, the use of saline nasal sprays should be discussed with a physician before self-administering. Though very uncommon and unlikely, side effects may occur, like stinging or burning sensations. If these occur, stop using immediately. Not intended to treat, cure, prevent or diagnose any disease or medical condition.

Always consult with a medical professional before using a nasal spray, especially if pregnant, nursing or under a doctor's medical care.

The use shared use of this product by more than one person may spread infection.
