

COSMOMETICA

The spirit of nature on your skin

As you can see every day in medical clinics, there is a growing number of patients with diseases whose origin is poisoning by endocrine disruptors, phthalates, formaldehyde, parabens, ... and many substances - studied and unstudied - included in cosmetics to improve conservation, texture, colour and to give a smell that helps repeat engagement

These components combine with the rest of toxics in the house and in the environment, and have a cocktail effect that can generate Multiple Chemical Syndrome (MCS) in some people, and diseases of all kinds.

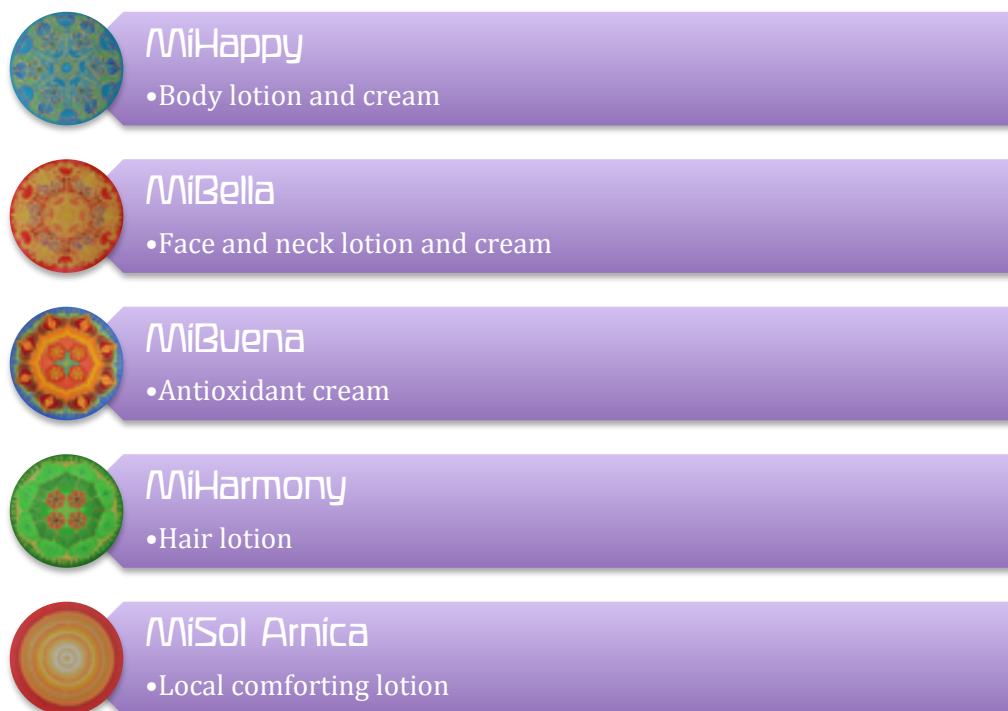

COSMOETICA is a line of cosmetics really natural and free from elements that can harm people. With organic certification (all substances from agriculture are organic), without chemical or pharmaceutical bases. We also have added best quality ingredients known to positively affect the skin and the two worlds for which is boundary: the physical body and the energy body. Products are treated with Equisalud I & D technologies and have followed principles based in the knowledge taught by Rudolf Steiner. In this way we have taken care of the good use of birch sap, beeswax, olive oil and the best part of each plant as we care for the production and the collection of each species according to the biodynamic calendar.

Finally the logo conveys the influence of earth and cosmos on people, and the importance of the skin as a Boundary. As an image full of message we chose different mandalas that bring the power of the waveform.

Of all these concepts was born COSMOETICA line with creams and lotions for body, face and neck and hair.

COSMOETICA products are encompassed in five lines:

And come in two different forms depending on the purpose of your application:

- LOTION. Refreshing and subtle. Powerful information that gives skin and hair a variety of aids.
- CREAM. Concentrated to a local nutrition, long-acting and regenerative over time.

Cosmoetica products are produced with the best natural ingredients, all of them certified organic. We follow the biodynamic calendar as much as possible, we incorporate the human knowledge of the etheric formative forces as an added value to the virtues of the plants used. In this way the products reach and maintain high levels of life forces and vitality.

Birch sap, plants, essential oils, and beeswax act regenerating, detoxifying and training the best capability of the skin as barrier between the outer and the inner world. Finally they act re-creating the order and the innate beauty in each person.

The skin restores its information and learning system. In this way through the anti-stress effect the skin recovers the precise elasticity, the precise tension and the vital alert that define its function as barrier.

They are especially suitable for people with allergies or sensitive to chemicals as well as for anyone looking for natural and organic products and for those who look beyond simple Cosmetics caring for their health.
